## ANALYSIS FEE SCHEDULE

| <u>ANALYTE</u>                                    | <u>COST</u> |
|---------------------------------------------------|-------------|
| Trihalomethanes (524.2)                           | \$45.00     |
| Haloacetic Acids (552.2)                          | \$100.00    |
| Total Organic Carbon                              | \$22.00     |
| Dissolved Organic Carbon                          | \$22.00     |
| UV254 SM                                          | \$15.00     |
| Alkalinity                                        | \$12.00     |
| Specific Conductance                              | \$12.00     |
| Turbidity                                         | \$5.00      |
| pH                                                | \$5.00      |
| Free/Total Chlorine                               | \$5.00      |
| Calcium Hardness                                  | \$12.50     |
| Chloride                                          | \$12.50     |
| Fluoride                                          | \$15.00     |
| Solids, Total Suspended                           | \$10.00     |
| Coliform, Total (Membrane Filtration-Qualitative) | \$12.50     |
| E. Coli (Membrane Filtration-Enumeration)         | \$12.50     |
| Standard Plate Count                              | \$12.50     |
| Fecal Coliform (MPN Index-Non Potable)            | \$35.00     |
| Lead                                              | \$10.00     |
| Copper                                            | \$10.00     |
| Aluminum                                          | Upcoming    |

### **Note:**

Most of the testing above is approved for drinking water only. Please contact the laboratory directly for further information or to schedule a specific test. Prices are subject to change. Committed long term contracts may qualify for additional discounts.

Lead and Copper Certification expected January 2017, accepting samples for Lead and Copper as of February 2017.

NYSELAP #10411  
EPA LAB CODE: NY01401
