## **Official Statement on Recent Discharge**

Yesterday evening a wet weather event occurred, which resulted in various discharges across the Buffalo Niagara region, including at the NFWB's Gorge Pump Station and Falls Street Tunnel. The NFWB discharge was a result of volume levels exceeding existing storage capacity. This discharge, done in accordance with current permitting, was also promptly reported. All statewide discharges are publicly disclosed at [www.nyalert.gov](http://www.nyalert.gov).

The NFWB will continue to provide periodic public and ratepayer updates on overflow and other discharge matters as such information becomes available. Updates will be available at [www.NFWB.org](http://www.NFWB.org).
