*****Media Update & Official Statement*****

**Repair Update on Water Main Break at 47th Street and
Niagara Falls Boulevard in City of Niagara Falls**

The Niagara Falls Water Board (NFWB) continues to work toward total completion of major water main break repair in the vicinity of 47th Street and Niagara Falls Boulevard in the City of Niagara Falls. Based on Department of Health requirements, the NFWB water quality lab has completed necessary testing to ensure safe drinking water standards are met.

Upon further analysis of the massive water main break repair, NFWB also identified an area in which air releases were impacting performance and required replacement. Those air releases, which are a mechanism that allow air to flow out of the system, are located on Pine Avenue and Hyde Park. The NFWB is proactively working to fully repair the air releases and anticipates this will be completed by Thursday. At that time, the area is expected to return to full pressure.

The NFWB will continue to provide updates as such information becomes available, via www.NFWB.org.
